Recommendations (optional):

Based upon the above mentioned security posture of the company (Botium Toys), I would rate it 7 out of 10 at the security risk index. Furthermore, there are some suggestions by my side for the company's IT department,

1. Implement Encryption: Ensure that all sensitive data, especially credit card information and PII/SPII, are encrypted.
2. Access Controls: Enforce the principle of least privilege.
3. Intrusion Detection and Prevention Systems (IDS/IPS): Deploy IDS/IPS solutions to detect and prevent potential security breaches.
4. Make proper arrangements for Backup and Disaster Recovery.
5. Enhance the password policy to meet current industry standards for password complexity and implement a centralized password management system.
6. Establish a clear schedule for monitoring and maintaining legacy systems to ensure they are up-to-date and secure.
